DBS 3500

Efficient, lightweight machine for the removal of underbody protection, polyurethane and other solvent based sealing compounds

- Especially suitable for substrate removal on weld seams.
- Ideal for working in inaccessible areas, eg. corners of car boots.
- Flexible brush belts with high performance fabric backing.
- U-Shaped spring steel wires adapt well to edges and contours.
- Wire brushes can be resharpened by reversing direction on an oil stone.
- Coarse Brush for removal of underbody seal, gives coarse sand blasting effect.
- Fine Brush for removal of rust and paint, no sand blasting effect.
- Stainless Steel Brush specially for aluminium bodies for removal of rust and paint, no sand blasting effect.

METAL CLEANING SYSTEM

Contents Description	Art. No.	Pack Qty.	Qty. in Set
