

Adjustable Glue Clamp 4"

- Spring clamp suitable for one handed use even at the maximum opening width of 100mm.
- Convenient clamping with constant clamping pressure.
- Extremely sturdy.

1. Swivelling clamping arm

The swivelling super polyamide clamping arm ensures optimum handling. It is light and can be quickly and infinitely adjusted.

2. Ergonomic 2 component handle

The ergonomically shaped 2 component handle is fitted with soft material inserts. This makes the handle pleasantly soft as well as particularly resistant to slipping.

3. Softpads

Particularly sensitive workpieces are effectively protected thanks to the soft pads.

Art. No.	Opening width	Depth	Jaw width	Weight kg	Pack/Qty
0714 661 901	100mm	50mm	38mm	0.17	4

Edge Clamps

- Suitable for clamping: edge bandings and edging strips onto curved and straight surfaces etc.
- Clamps can be pushed on and tightened in seconds.
- Excellent contact pressure, due to sprung loaded "D" shaped jaws. As clamp is tightened the jaws grip tighter, eliminating slippage.
- Gluing of heavy solid edges. The high contact pressure makes it possible to press edge bands onto curves.

Designation	W g	Art. No.	P. Qty.
Edge clamp, small for 4.5cm max. sheet thickness	780	0715 67 40	1
Edge clamp, large for 8cm max. sheet thickness	1600	0715 67 41
