

WÜRTH MASTER **M-CUBE® CORDLESS** **POWER TOOLS 18 V**

M-CUBE®
BATTERY-SYSTEM

MAXIMUM POWER. MAXIMUM FLEXIBILITY.

INSPIRED BY YOUR IDEAS. MADE BY WÜRTH.

FULL POWER. FULL SERVICE. That is what we promise our customers with our new range of high-performance cordless power tools. As a manufacturer, we can cater to your specific design and functionality requirements while maintaining our high internal quality standards. Our new generation of 18V WÜRTH MASTER cordless power tools will be complemented by many new tools based on the M-CUBE® battery system over the next few years, so you can look forward to a great range of powerful new tools in our cordless M-CUBE® family.

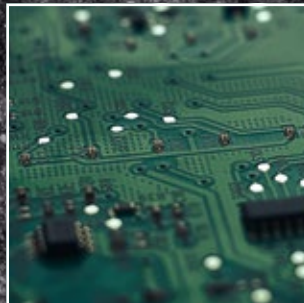

With the high-performance M-CUBE® batteries you benefit from maximum flexibility. Within the 18 V M-CUBE® system all batteries are compatible and interchangeable with all power tools and chargers out of the 18 V M-CUBE® range. With the M-CUBE® battery system from Würth you are on the safe side. Thanks to intelligent features, the new M-CUBE® batteries can take a lot and last longer.

M-CUBE[®]
BATTERY-SYSTEM

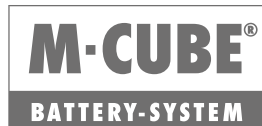

NEW
BATTERY TECHNOLOGY

POWERFUL BATTERY TECHNOLOGY: DURABLE & SAFE.

- Integrated cell frame for secure fit and optimum heat dissipation, protects the battery from overheating and shocks
- LED charge status indicator shows the remaining battery capacity
- Intelligent battery management for maximum output and maximum service life
- Rubber bumper on battery pack ensures solid and non-slip base
- Electronic monitoring of individual cells expands battery service life

DEVELOPED BY WÜRTH, TO MEET THE NEEDS OF CRAFTSMEN.

Three speed/torque levels, as well as three other modes that can be set for the correct screwing task, allow optimal adjustment for a wide range of applications. Optimum illumination of the working area thanks to triple LED on the gear head. The brushless motor with overload protection is low-maintenance, long-lasting and powerful. Effortless and user-friendly work thanks to the compact and lightweight design with rubberised handle. No recoil or torque effect on the wrist. The integrated quick-change holder for ¼ inch E 6.3 bits enables a fast and tool-free bit change.

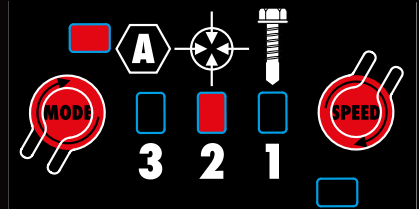

Mode for self-drilling screws

100 % of the maximum rotation speed. Automatically reduces to 70 % of the maximum rotation speed when the hole has been drilled, reducing the risk of a stripped screw.

Auto-stop mode

Clockwise rotation only, tightening at full speed with automatic stop when the screw has been tightened (metric screws).

Assistance mode

In clockwise rotation setting: 30 % of the maximum rotation speed for a clean and easy start, then automatic increase to the maximum rotation speed. In reverse rotation setting: 6 impacts followed by an increasing rotation speed for gentle loosening of screw connections.

KEEPS UP EVEN IN TOUGH APPLICATIONS. WITHOUT MAKING YOU TIRED.

The compact cordless hammer drill ABH 18 Compact makes fast and precise working possible without fatigue even in the case of extremely hard applications. The optimized adjustment of impact strength to impact frequency accelerates the drill progress and increases the material removal during corrective chiseling. You can switch between hammer drilling, drilling and chiseling in no time. Also thanks to the included quick-release chuck, adaptation to the respective application is very easy. A clean job: The powerful, additional dust extraction system avoids dirt and the anti-vibration system protects the users' hands and wrists.

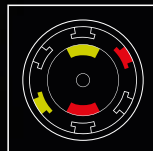

ANTIVIBRATION SYSTEM:

Dampens harmful vibrations significantly and makes longer operating times possible for the user.

ELECTRONIC MOTOR PROTECTION:

The electronic motor protection system switches off the motor if it is blocked, overloaded or overheated, thus extended product life time is reached.

BRUSHLESS MOTOR:

The EC-motor requires less maintenance because carbon brush replacement is not required. It is more efficient, more powerful and more compact.

FUNCTIONAL SWITCH:

Quick and easy switching between hammer drilling, chiseling and drilling. Additional setting to position the chisel.

DRILL CHUCK:

Besides the SDS-plus mount a 13 mm full metal chuck with carbide tipped jaws for optimal grip is included in delivery.

IT'S HIGH-PERFORMANCE AND SAFETY FEATURES WILL CONVINCING YOU.

Our powerful, brushless cordless angle grinder AWS 18-125 P Compact/AWS 18-115 P Compact – made for medium-duty cutting and grinding applications – will win over any user with its durable high-performance motor, ergonomic design and numerous health & safety features.

ELECTRONIC MOTOR PROTECTION:

Continuous monitoring of the motor and contact-pressure indication by LED. Longer service life, as the motor is switched off prematurely in the event of blocking, overloading or overheating.

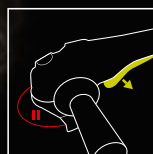

TOOL-FREE QUICK-RELEASE SYSTEM:

Quick-clamping-nut and tool-free adjustment of the protective hood ensures fast adaptation to various applications.

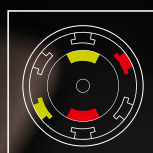

ANTI-VIBRATION HANDLE:

Damps harmful vibrations significantly! Can be attached to three different positions for maximum comfort and perfect ergonomics.

DEAD MAN'S SWITCH:

For safe working! The brake function ensures a quick stop of rotating disc as soon as the switch is released.

BRUSHLESS MOTOR:

The EC-motor requires less maintenance because carbon brush replacement is not required. It is more efficient, more powerful and more compact.

THE POWER PACK FOR THE PERFECT FINISH.

Powerful 18 V caulking gun that ensures a perfect and clean finish for each bead as well as clean work. Thanks to the automatic anti-dripping function.

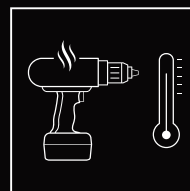

HIGH APPLICATION POWER WITH VARIABLE FEED SPEED:

Due to the feeding speed adjustment wheel, the pressure actuated trigger, as well as the high application power of 5 kN, even high-viscosity materials can be pressed out easily, smoothly and constantly.

FOR UNIVERSAL USE:

Thanks to optional accessories, the caulking gun can be ideally used with various containers. This makes it easy to use 600/400 ml bags and 310 ml cartridges.

ELECTRONIC MOTOR PROTECTION:

The electronic motor protection system switches off the motor if it is blocked, overloaded or overheated, thus extended product life time is reached.

ROBUST METAL GEARBOX WITH AUTOMATIC DECOUPLING:

Durable and robust metal gearbox, which ensures a long service life and optimum power transmission from the strong motor.

Due to the automatic decoupling function the push rod is pulled back immediately after releasing the trigger, thus preventing the sealant from running/dripping.

 BATTERY-SYSTEM

Body only

£180.83

Art.-no.	5701 410 000
Nominal voltage	18 V/DC
Pressing force	5,000 N
Weight with battery	2.3 kg
Feed speed	0 - 66 cm/min

THE FAST ONE, TO MEET THE NEEDS OF CRAFTSMEN

Light weight and compact 18 V cordless drywall screwdriver with automatic function for higher efficiency and quick serial screwing.

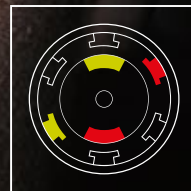

AUTOMATIC FUNCTION:

If the switch is locked in AUTOMODE, the motor will only be triggered by the contact pressure of the positioned screw. As a result, pleasant, energy-saving and low-noise working is achieved.

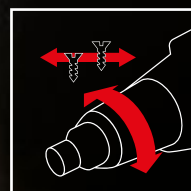

ELECTRONIC MOTOR PROTECTION:

The electronic motor protection system switches off the motor if it is blocked, overloaded or overheated, thus extended product life time is reached.

BRUSHLESS MOTOR:

The EC-motor requires less maintenance because carbon brush replacement is not required. It is more efficient, more powerful and more compact.

DEPTH STOP:

Easy adjustment of screw depth for precise working results.
