

## UK Reach Compliance Statement

UK REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) has applied in Great Britain since 1 January 2021 and operates independently from EU REACH.

Würth UK Ltd is committed to complying with all applicable UK REACH obligations for chemical products placed on the Great Britain market. Where required, we will provide our customers and other recipients in the supply chain with appropriate product information, including safety and regulatory information, in accordance with UK REACH requirements.

Where we supply chemical products (substances and mixtures), we support the aims of UK REACH and maintain processes to help ensure ongoing compliance. Where we supply articles, we will support relevant information duties where applicable (for example, in relation to substances of very high concern).

This statement reflects Würth UK Ltd's commitment to protecting human health and the environment and to meeting our legal obligations.
